Skills

Frontend: React.js, Next.js, Vue.js, Nuxt.js, Tailwind CSS, CSS, JavaScript, HTML, Redux, Pinia, Zustand

Backend: Node.js, Express.js, REST APIs, Server Actions, Microservices, BullMQ, Redis (Job Queues)

Databases: MongoDB, PostgreSQL, SQLite, Redis

AI & Integrations: LangChain, LangGraph, OpenAI APIs, Google GenAI, VapiAI, TwelveLabs

Technologies & Tools: Docker, Git, GitHub, GitLab, Postman, Figma, shadcn/ui, Prisma

Work Experience

Edvanta Technologies, Noida, UP

Apr 2025 – Apr 2026

Associate Fullstack Developer

- Built and scaled **Profiled**, an AI-driven career platform with fullstack architecture for personalized learning and evaluation.
- Integrated Cognifit APIs and implemented AI interview workflows using Vapi and TwelveLabs for real-time interaction and evaluation.
- Engineered **MaxxMind**, a modular cognitive games system with SDK-based iframe embedding and event-driven communication.
- Implemented job queues using **BullMQ and Redis**, reducing initial AI interview response time by **~96%** (from ~8–10 minutes to ~20 seconds).
- Built REST APIs, backend services, and analytics dashboard to manage users, assessments, and engagement metrics.
- Features:** Graph-based quest builder, scenario-based branching quests (multi-ending flows), AI interview agent builder, RAG-based AI chatbot, payment integration (Stripe, Razorpay with webhook handling), gamified assessments, admin dashboard
- Technologies:** Vue.js, React.js, JavaScript, Node.js, Express.js, MongoDB, Redis, BullMQ, VapiAI, LangChain

Edvanta Technologies, Noida, UP

Sep 2024 – Apr 2025

Fullstack Developer - Trainee

- Built and deployed a corporate website using **Nuxt.js (SSG)**, improving SEO and load performance.
- Integrated **Notion CMS** for dynamic blog content.
- Configured development and production environments for streamlined deployment.
- Features:** SSG, SEO optimization, blog system, responsive UI
- Technologies:** Nuxt.js, Vue.js, JavaScript, Tailwind CSS, Pinia, Notion CMS, shadcn/ui

Education

MRIIRS, Faridabad, HR

Aug 2023

Master of Computer Applications (MCA)

GPA: 7.76

Relevant Coursework: Data Structures, Algorithms, Databases, Java, Android Development, HTML, CSS, JavaScript

Project Work

Wearo: Fullstack E-commerce Platform - Live Demo

- Designed and developed a fullstack e-commerce platform using Next.js (App Router) with authentication via NuxtAuth, implementing product listing, filtering, cart, wishlist, and checkout flows.
- Built backend services and REST APIs for product, user, and order management, along with an admin dashboard for inventory and order tracking.
- Integrated Razorpay payment gateway with secure order handling and transaction validation.

ProfileIQ: Job Search & Career Insights Platform

- Built a job discovery platform with real-time listings based on user location using **SerpAPI**, integrating external data sources for dynamic job feeds.
- Developed a **skill-matching engine** that compares user skills with job requirements and provides salary insights and market indicators using **BLS data**.
- Implemented a resource recommendation system using **LangChain and OpenAI APIs** to suggest learning paths for closing skill gaps.
- Built a resume generator with template selection and export functionality, including **AI-based resume enhancement** and **ATS scoring system**.
